## PROFESSIONAL SUMMARY

---

Results-driven Data Analyst with over 9 years of experience spanning statistical analysis, supply chain analytics, and data engineering across the public sector and agri-food industry. Currently supporting global sourcing operations at Mucci Farms, one of Canada's leading produce companies, where he designs automated ETL pipelines, builds BI dashboards in DOMO, and develops data-driven tools to optimize grower supply forecasting and procurement decisions. Holds a post-graduation degree in Data Analytics for Business from St. Clair College (4.0 GPA, Faculty Academic Award) and a Bachelor's degree in Mathematics from the University of Havana. Proficient in Python, R, and SQL with hands-on experience delivering actionable insights from ERP-integrated data in fast-paced, commodity-driven environments.

**Technical Skills:** Python · R · SQL · Power BI · DOMO · Tableau · Excel · Airtable · DOMO ETL · Power Automate · Pandas · ggplot2

## EXPERIENCE

---

### Mucci Farms | Data Analyst

Kingsville, Ontario | February 2025 - Present

- Designed and automated multi-frequency (weekly, monthly, quarterly, annual) Purchase Order profitability reports by vendor using DOMO, integrating ERP data to surface margin variances and supply chain KPIs for the Global Sourcing Manager.
- Built and maintain a supply forecast fill rate dashboard in DOMO tracking performance against weekly supply plans across 20+ contracted and owned farms and 35+ commodities, enabling data-driven sourcing decisions.
- Engineered an end-to-end rejection workflow using DOMO ETL pipelines that ingests customer rejection records from the ERP and automatically extracts key fields — grower/vendor, rejected case count, rejection reason, PO reference, receipt date, and ship date — then notifies the responsible grower liaison, saving approximately 2 hours of daily manual email triage.
- Developed sales and supply budget reporting by aggregating inbound supply volumes from all grower partner and owned farms by commodity, supporting budget-to-actual variance analysis across procurement cycles.
- Architecting a Grower Portal using Softr (front-end) and Airtable (relational back-end), implementing role-based access for farm users and internal staff; features include weekly forecast submission, program management, long-term volume projection, and pack plan visibility.

### St. Clair College | Data Analyst Intern

Windsor, Ontario | July 2022 - July 2023

- Created and managed the REDCap database for the 1000 Books Before Kindergarten project, created in REDCap the data entry forms and survey of the pre-test and post-test research.
- Monitored data quality and performed quality control checks which improved the quality of the data collected, enabling more precise measurement of the project's impact on early childhood literacy.
- Created a descriptive data analysis report with user-friendly graphics to visualize survey results, making complex data more accessible and interpretable for stakeholders.

### Statistics and Information Office | Statistical Analyst

Havana, Cuba | September 2015 - October 2021

- Compiled tables, charts, graphs, and summarized statistics for integration in research papers and reports using R.
- Collected, consolidated, cross-tabulated, and formatted data from various sources to prepare draft reports for review by supervisors or researchers using SQL.
- Processed data using statistical software R to develop the Oxford Poverty methodology for measuring multidimensional poverty.
- Designed questionnaires and implemented sampling strategies for household surveys.
- Employed data imputation, data cleansing, outlier detection, and consistency form rules to ensure data quality.

## EDUCATION

---

### St. Clair College

Post-graduation degree in Data Analytics for Business

*GPA: 4.0 Faculty Academic Award*

Windsor, Canada

May 2022 - August 2023

### University of Havana

Havana, Cuba

Bachelor's degree in Mathematics  
*GPA: 3.2*

September 2011 - July 2015
